

Daylight sensor lamp-- automatic outdoor lighting

Daylight sensor is integrated in the CFL, the photodiode keeps on checking the natural light, and turn on the lamp when the surrounding natural light is below the pre-defined threshold. And turn off the lamp automatically when the natural light has reached the target lux.

The threshold is pre-set in the factory, the lux value range is 2-500 lux. can be set according to customers specific need.

| Photo | Model No. | Wattage | Size (L x ϕ) | Lumen Output | Switching cycles | Mercury content | Start time | Standard Pack* |
|---|-----------|---------|--------------------|--------------|------------------|-----------------|------------|----------------|
| Globe sensor light | | | | | | | | |
|  | DS115 | 15 | 128 x 60 | 800 | 10000 | ≤ 2 | < 3 | 60(10)* |
| | DS120 | 20 | 138 x 60 | 1150 | 10000 | ≤ 2 | < 3 | 60(10)* |

Color temperature available in 2700k / 4000k / 6500k.
