

DALI BUS POWER SUPPLY HT02

Installation and Instruction Manual

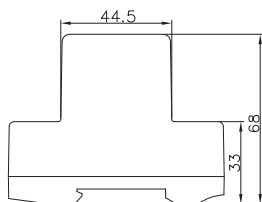

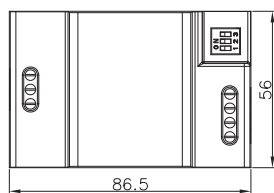

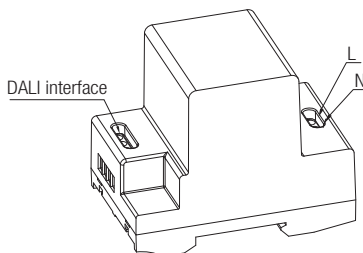

HT02 is a DIN rail mountable DALI power supply with protection against over-load and short circuit, supplying 240mA for DALI control gears and DALI devices which without power supply circuits.

1. Product description

- 240mA output capability
- DIN rail mounting
- Over-load protection
- Short circuit protection

2. Technical Specifications

Product type :	DALI bus power supply
Operating voltage:	220-240VAC 50/60Hz
Input current:	30mA (Maximum)
Output current:	240mA (Maximum)
Output voltage:	16V \pm 10%
Operating temperature:	-20°C ~+50°C TC:80°C
Terminal capacity:	0.25 - 2.5mm ²
Safety standard:	EN61347-2-11
EMC standard:	EN55015, EN61547, EN61000
DALI standard:	IEC62386-101
Dielectric strength:	Input -> output 3000VAC

Dimensions (mm)
