

IP65 Dual Sense Sensor with Bluetooth 5.0 SIG Mesh

HIM84 (High Bay)

HF and PIR, Tri-level control & Daylight Harvest for Independent DALI/DALI2

HYTRONIK[®]

Product Description

HIM84 is a Bluetooth DALI / DALI2 high-bay Dual-sense™ (Microwave + PIR) motion sensor, with capability of up to 1.5m installation height. It is designed with robust IP65 structure, and offers 3 different installation methods and 3 different lens options. With Bluetooth wireless mesh networking, it makes communication much easier without any hardwiring, which eventually adds values to luminaires and saves costs for projects. Meanwhile, simple device setup and commissioning can be done via **Koolmesh™** app.

App Features

- Quick setup mode & advanced setup mode
- Tri-level control
- Daylight harvest
- Circadian rhythm (Human centric lighting)
- Floorplan feature to simplify project planning
- Web app/platform for dedicated project management
- Koolmesh Pro iPad version for on-site configuration
- Grouping luminaires via mesh network
- Scenes
- Detailed motion sensor settings
- Dusk/Dawn photocell (Twilight function)
- Push switch configuration
- Schedule to run scenes based on time and date
- Astro timer (sunrise and sunset)
- Staircase function (master & slave)
- Internet-of-Things (IoT) featured
- Device firmware update over-the-air (OTA)
- Device social relations check
- Bulk commissioning (copy and paste settings)
- Dynamic daylight harvest auto-adaptation
- Power-on status (memory against power loss)
- Offline commissioning
- Different permission levels via authority management
- Network sharing via QR code or keycode
- Remote control via gateway support HBGW01
- Interoperability with Hytronik Bluetooth product portfolio
- Compatible with EnOcean switch EWSSB/EWSDB
- Continuous development in progress...

Hardware Features

- 40mA DALI/DALI2 Broadcast output
- 4 Modes: 4 work modes:
 - HF only
 - PIR only
 - HF + PIR
 - HF / PIR
- 3 installation methods
- 3 lens options
- IP65 design
- High-bay (up to 1.5m height)
- 5-year warranty

EnOcean
Self-powered IoT

Fully support
EnOcean switch
EWSSB/EWSDB

Technical Data

Input Characteristics

Model No.	HIM84
Mains voltage	220~240VAC 50/60Hz
Stand-by power	<1W
Switched power	Max. 20pcs devices, 40mA
Warming-up	30s

Sensor Data

Model No.	HIM84
Sensor principle	High Frequency (microwave), PIR
Operation frequency	5.8GHz +/- 75MHz (HF)
Transmission power	<0.2mW (HF)
Sensor mode	4 modes: PIR, HF, PIR+HF, PIR/HF
Detection range	Max installation height: 1.5m Max detection range: 18m (diameter)
Detection angle	360°

Safety and EMC

EMC standard (EMC)	EN55015, EN61000-3-2/-3-3
Safety standard (LVD)	EN60669-1, EN60669-2-1
Radio Equipment (RED)	EN300440, EN301489-1/-17/-3, EN62479, EN300328
Certification	CB, CE, EMC, RED, RCM

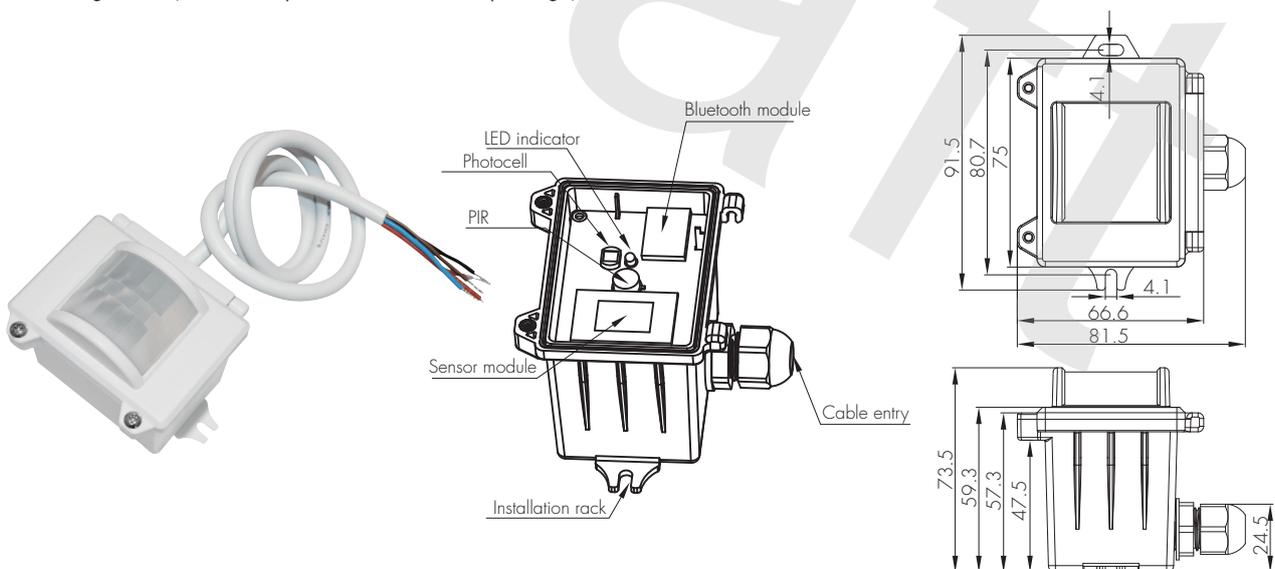

Environment

Operation temperature	Ta: -20°C ~ +50°C
IP rating	IP65

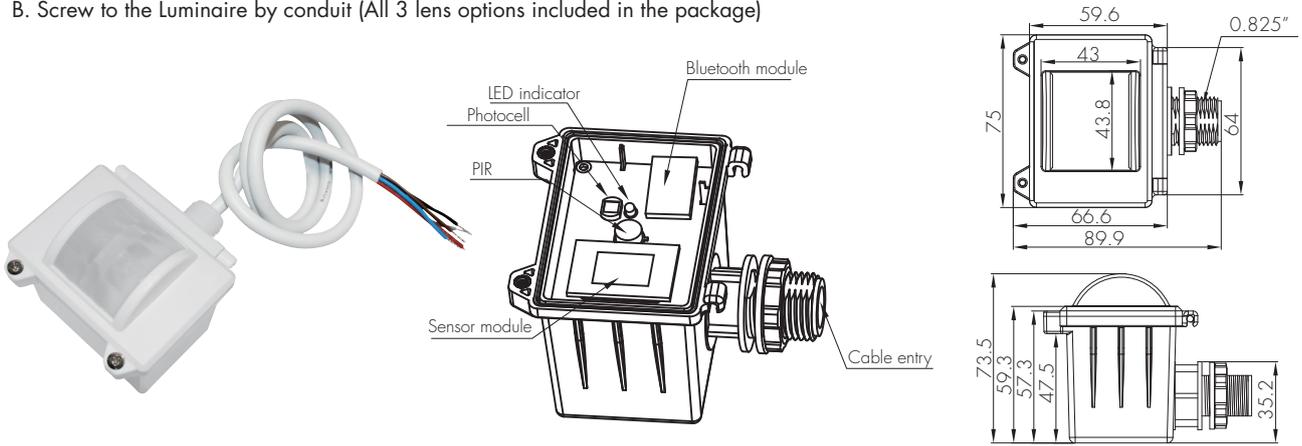

Mechanical Structures and Installations

For more details, please refer to user manual.

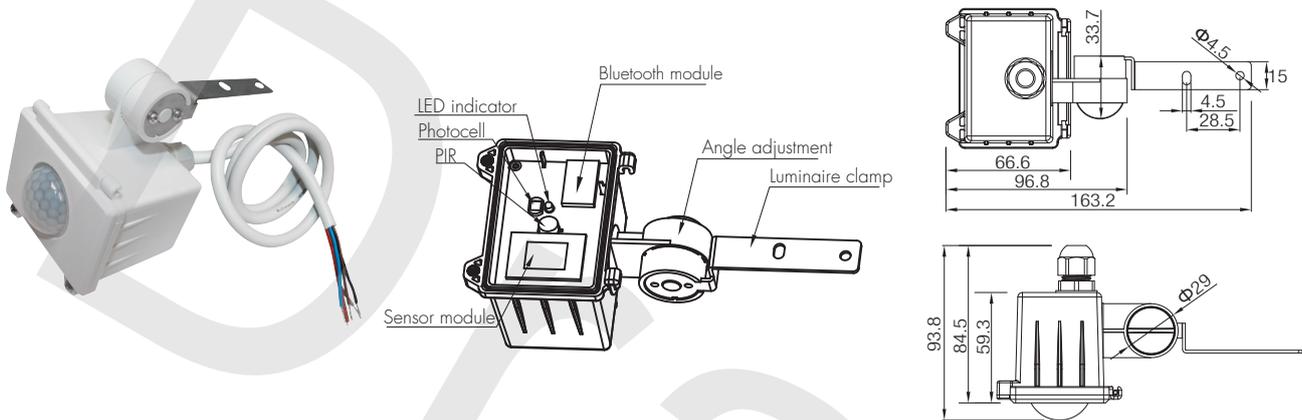

A. Ceiling mount (All 3 lens options included in the package)

B. Screw to the Luminaire by conduit (All 3 lens options included in the package)

C. Attach to the shade by clamp (All 3 lens options included in the package)

Note: We recommend the mounting distance between sensor to sensor should be more than 2m to prevent sensors from false-triggering.

Dual Sense Introduction

It's commonly known Microwave and Infrared are main detecting technologies in lighting controls. Both have the advantage and disadvantage for industrial applications.

Advantage

- * sensitive to minor motion.
- * sensitive to radial movement.
- * can be reflected by objects hence covering big detection area
- * resilient to heat source, smoke and air conditioner.

Advantage

- * no penetration, confined detection area.
- * sensitive to tangential movement.
- * resilient to motion object which has no heat radiation.

Disadvantage

- * penetrates walls, picks up motions outside of the office area;
- * back wave detection, false trigger by motions at the back.
- * can be false triggered by ventilation fans, water pipe, elevators etc. in industrial application.

Disadvantage

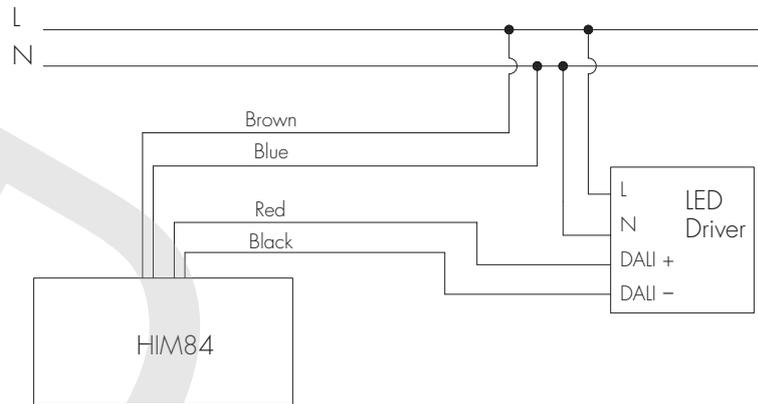

- * can be false triggered by air conditioner, smoke and other heat sources.

The remedy is to create Dual Sense by combining both technologies to make use of the advantage and bypass the disadvantage.

4 optional detection modes selectable:

- * HF: Microwave only
- * PIR: PIR mode only
- * HF+PIR: both PIR and microwave mode, to decrease the detection capability and detection area. Only when both detections are activated, the motion is considered valid. This is to prevent the sensor from false trigger by heat source, air conditioner, ventilation fans, water pipe and elevators etc...
- * HF/PIR: either PIR or microwave mode, to increase the detection capability and detection area;

Wiring Diagram

Detection Pattern

End user can choose the suitable PIR lens in real application to fulfill various requirements. Three options are offered for selection:

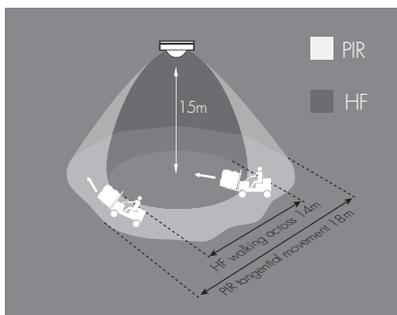

Lens option 1

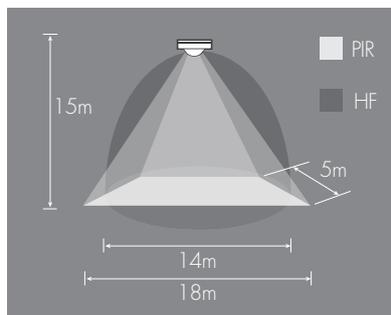

Lens option 2

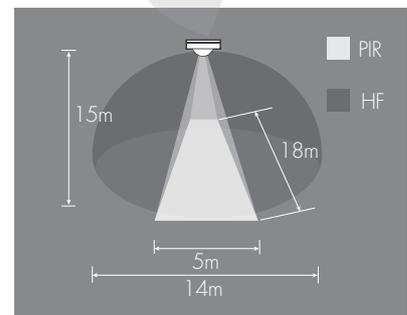

Lens option 3

PIR detection: H x D: 15 x 18m (max.)
 HF detection: H x D: 15 x 14m (max.)

PIR detection: L x W x H: 18 x 5 x 15m (max.)
 HF detection: H x D: 15 x 14m (max.)

PIR detection: L x W x H: 5 x 18 x 15m (max.)
 HF detection: H x D: 15 x 14m (max.)

* For single person walking across, the detection range is reduced by 1/3.
